Web

Definitions of **White oil** on the Web:

- Highly refined mineral oil, essentially colorless, odorless, and tasteless. White oils have a high degree of chemical stability. White oils have many industrial applications - including textile, chemical, and plastics manufacture - where their good color, non-staining properties, and chemical inertness are highly desirable.
www.chevrontexacoursa.com/glossary/w.html
- Lighter products from the top end of the refining process as distinct from "black" oil.
